Eric Kim.

Projects

Vocaby Winter 2020
A Google Chrome extension that helps to expand the vocabulary of non-native English speakers.
Developed for the 8th Annual WINFO Hackathon at UW Seattle

INFO 201 The Olympics Spring 2019
Developed an interactive web visualizing app using a dataset from the 1896 Athens to 2016 Rio Olympic games. Analyzed correlations between the characteristics of athletes and the number of medals they won.

INFO 200 ShareTI Fall 2020
Designed a journaling mobile application to help those dealing with depression and anxiety. Implemented the back-end features using Node.js Framework and integrated interfaces using React. Led interaction design and wire framing.

Publication

Scaling Parallel File Systems Winter 2019
Published an abstract on scalably tuning high-performance parallel systems in the cloud such as Lustre, BeeGFS, and Gluster.
Earned $5000 Google Cloud Research Grant.

Organizations

UW Leaders Winter 2019 - Spring 2019
Developed leadership practices with different leaders at the University of Washington.
Designed interfaces and conducted user studies for a journaling app as a leadership project.
Leadership project presented at the spring celebration of service and leadership.

Chinese Information Service Center Winter 2019 - Spring 2019
Assisted middle school students from low income immigrant families to develop essential assets within a multicultural environment. Offered homework assistance, and mentorship.

Education

University of Washington
Developed leadership practices with different leaders at the University of Washington.
Designed interfaces and conducted user studies for a journaling app as a leadership project.

Skills

Development	**Design**	**Tools**
HTML CSS SCSS	Interaction Design	Adobe Creative Cloud
Javascript JQuery	User Research	Figma
React Redux	Wireframing	InVision
Node Firebase	Data Visualization	
Java R
